

## URBAN PLANNING (2.5 YEARS)

### OBJECTIVES

Our mission is to develop versatile urban planning experts excelling at the intersection of theory and practice. We foster growth across moral, intellectual, physical, aesthetic, and ethical domains, preparing students to tackle pressing challenges facing human settlements. Anchored in localized environments yet celebrating diverse regional cultures, our program equips future leaders with the foresight and accountability essential for shaping the forefront of global progress.

### PROGRAM SPECIALITY

- ① Our Urban Planning discipline ranks among the top in China, maintaining a nationally leading position.
- ② Ranked 51-100th in the faculties of architecture and built environments in the QS Ranking.
- ③ First-class education and research environments supported by the State Key Laboratory, international joint laboratories, provincial-level research platforms, and MoU and academic cooperation with overseas universities.
- ④ Strong links with industry.
